Create headers, page titles & banners at this site.

Word Mosaic has been used to create many of the page banners used in this wiki.

Click Create, Word Mosaic, symbol (to select the shape), chose the text color& background, enter the text, then hit Preview. Hit the double arrows in the bottom, left corner to "rearrange the text" until you see an arrangement that you are happy with. Hit export, then medium, and you will be provided with an "embed code" Hit copy to capture the code. In your wiki, in the Edit mode of your page click Insert, HTML/JavaScript, right click to paste the code in the box, click on the box "  ☐  Allow JavaScript and other potentially unsafe code, then Next, and finally "Insert Plugin" to add the image to your page. At the bottom of the page hit Save in order to see your work on the page. You can re-enter Edit mode to move the image to the center, left, or right of the page.

Take some time to discover the many, many, many types of banners, signs, photos, etc. at Image Chef which you can create and embed to personalize your wiki.
