BE CERTAIN to set your workspace security and access controls found under “settings” to ANYONE. Visitors would still need your permission to change or edit the page. You will need to make sure that you have used this setting so that visitors will be able to access your wiki from the link that you will place in Blackboard and LiveText. If you choose the “Only people I invite or approve” option, you will receive an email requesting approval each time someone clicks on the url for your wiki.
